 - **California:** \$457,687.63 in sales, \$76,381.39 in profit (highest sales and profit)
 - **Florida:** \$89,473.71 in sales, but a loss of -\$3,399.30
 - **Illinois:** \$80,166.10 in sales, but a large loss of -\$12,607.89
- **States with Highest Profit:**
 - **California:** \$76,381.39
 - **Indiana:** \$18,382.94
 - **Georgia:** \$16,250.04
- **States with Significant Losses:**
 - **Illinois** and **Colorado** show high negative profit despite solid sales numbers.
- **Total Metrics:**
 - **Total Sales:** \$2,297,200.86
 - **Total Profit:** \$286,397.02
 - **Total Discount Given:** \$1,561.09

1.2 SUMMARY

Insights Summary

- **Consumer segment** and **East region** are driving the majority of revenue.
- **Standard Class** is the dominant shipping mode across all segments.
- **California** is the top-performing state by both sales and profit.
- Some high-sales states like **Illinois** and **Colorado** are underperforming in profit, suggesting possible inefficiencies or over-discounting.
